

Title

## HEALTH & SAFETY POLICY STATEMENT

Health & Safety  
System Document

**ML2002A**

*This Health & Safety Policy Statement, and the arrangements for its implementation, go together with the "Company Safety, Occupational Health & Environmental Procedures" to ensure, so far as is reasonably practicable, the Health, Safety and Welfare of all its employees and others who may be affected by its operations.*

The Company policy is to provide and maintain safe and healthy working conditions, equipment and systems of work for all our employees, and to provide such information, training and supervision as they need for that purpose. We also accept our responsibility for the health and safety of other people who may be affected by our activities.

The company will achieve the aims and objectives of this policy by:

- Carrying out written Health & Safety Risk Assessments for all operations which have a significant risk, recording the risks and control measures, and communicating such information to employees.
- Ensuring adequate resources are provided, financial and otherwise, to support all Health and Safety activities, and to do everything within our reasonable control to prevent Injury and Ill Health to all employees and any third parties.
- Making arrangements for effective communication between management and employees, and any other interested party, including this Health & Safety Policy Statement.
- Providing plant and equipment which is tested, certified and safe to use.
- Ensuring proper measures are taken to maintain high standards of hygiene, cleanliness and housekeeping.
- Identifying workplaces which may be difficult to evacuate in an emergency, where necessary draw up evacuation procedures and ensure they are under the control of trained people, and to periodically test these emergency plans to ensure continued suitability.
- Complying with all relevant Health and Safety legislation, and any other requirements to which the company subscribe.
- Setting new Health and Safety objectives each year to raise standards, improve performance and reduce the overall risks to staff and others from our operations.
- Ensure that our Health & Safety Policy is periodically reviewed for continued applicability.

Milner Landscapes & Construction Ltd will continually strive to improve our Health and Safety systems and standards by measuring, monitoring, reviewing and auditing our health and safety performance in all areas of our operations. We shall investigate problems or non-compliances, identify possible improvements, and we will implement all necessary remedial actions to improve the Management of Health & Safety within our business.

The organisation, allocation of duties, arrangements and responsibilities for all safety matters will be clearly detailed within our Health & Safety Management Systems.
